TERMS AND CONDITIONS

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by PGG Wrightson Limited (PGW), PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at:

www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions
or in hardcopy on request.

All intending purchasers must register at the sales office prior to the sale.

PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

31th ANNUAL STUD AND COMMERCIAL BULL SALE

All Bulls are semen and service tested.
All Bulls are blood tested free of BVD and vaccinated.

Morning tea and luncheon available

Glen Anthony Stud est.1974

45 years on, we present our 31st Bull Sale

The past years Highlights

Calving Date.

Please note that we have chosen to put our calving date back to July and August. In 2017 we only had 6 calves born on late June and all of these were either born to 2 yr old heifers or from embryo transfer. Three of those June calves have been good enough to be included in this catalogue.

Polled Cattle.

We are committed to continuing to use only polled or scurred stud sires. So far Y-arta has consistently produced the largest percentage of clean polled offspring.

We hope that as more polled sires come on to the market there will be greater opportunity to breed or purchase a good quality homozygous polled bull which will speed our desire to produce a completely polled herd.

Winter 2018

After an exceptional Autumn the cows went into winter in excellent condition. Kerry Arnold our Stock Manager kept his finger on the pulse and with break feeding, silage and hay the whole herd calved in excellent condition.

Calving was a breeze except for two first calving heifers. One had blocked teats and the other a small pelvis leading to a caesarean.

Summer 2018-19

“Where have all the rains gone?” after a wet July and early August the spring rains disappeared and with a very dry October we were heading for an early Summer drought. Our usual hay and silage providers phoned warning us that no paddocks had been shut up. Our barns were empty, all our baleage had been fed out – things looked fairly grim.

Lucky for us November brought about a change that would stand us in good stead for the next six months.

Firstly we were able to buy 160 bales of Autumn saved baleage from Nicky Tillet in Ashley Clinton. Then Shane McDonald came to our aid with another 40 bales from Taranaki. Ross Clayton recognising our predicament, stood aside from a grazing arrangement he had with Neville Flaws on Middleton Road and gave us access to grass on a 40 hectare farm with no stock. 10 hectares were almost ready for baleage with the remainder requiring more time and some rain to produce grass worth harvesting.

The first rain arrived on 26th November and over the following week we had 100mm which set the pattern for the next 6 months with 20 to 80mm of rain coming at regular fortnightly intervals. The grass at Middleton Road bloomed, Tim Moore phoned back to say that hay would be available after all and so our “cup overflowed”. By the end of January our baleage stacks and haybarns were overflowing. Totally Amazing!

2018 Mating

With cows in great condition, regular rainfall, excellent grass growth, we achieved 100% “in calf” rate with 3 dry cows offset by 3 sets of twins.

Autumn 2019

Totally amazing. The grass grew all Summer and didn’t stop. Regular rain and temperatures as high as 26° Celsius going right into May, what an amazing year. We have seen clover like it and the regrowth of both grass and clover after each rotation was amazing. Our weaning weights and weights of our yearling cattle were down on past years but that would be easily explained by our later calving dates.

Show Season

The only show we competed at this season has been the NZ Royal Show in Hastings on the 18th and 19th October as we had the only Simmental cattle entered, the breed classes were not difficult to win. Our three year old bull Glen Anthony Democrat AD18, won the Supreme Champion award ahead of our 2 yr old entries Glenanthony Executive and Glenanthony Estelle (with calf at foot). We presented a large number of yearling cattle but sadly this year, the quality was lacking.

In the all breed classes our senior cattle were beaten by the Saler entries from Willowcreek (Wellsford) and our yearling cattle took the minor prizes behind excellent Charolais bulls from Simon and Wendy Collin and an amazing Belgium Blue heifer all the way from Tuakau. The only Highlight for us was Glenanthony Estelle winning the all breeds champion 2yr old class while the low light was our failure to make the top three in the Meat and Wool Cup.

With family issues coming first we didn’t take a team to the Dannevirke Show this year and with Future Beef moving to Masterton we were not involved there either.

After such an amazing Summer and Autumn our bulls are looking well, and we hope you are able to attend our sale on Friday 7th June.

Please note that we will also have 15 rising one year old heifers for sale if anybody is interested?

COMMENTS:

A polled sire belonging to Semex in Canada, used through AI to further our polled programme. Bank Roll is a solid red bull of moderate frame and good conformation.

SIMMENTAL NZ BEEF CLASS STRUCTURAL ASSESSMENT

Glen Anthony Stud has adopted the Beef Class Structural Assessment system promoted by Simmental NZ for use across the entire Simmental breed. This system replaces the Quality Assurance Programme which centred on a stock audit carried out by the breed society appointed classifiers. Under the Beef Class system, it is the responsibility of individual stud breeders to assess their own stock for structural soundness docility.

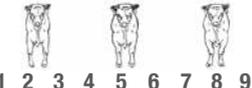

HOW TO USE THE BEEF CLASS STRUCTURAL ASSESSMENT SYSTEM

The major structural trait scores for each bull are outlined in this catalogue.

- A score of 5 is ideal.
- A score of 4 or 6 shows some variation from ideal - but acceptable.
- A score of 3 or 7 shows more variation yet acceptable in commercial herds.
- Bulls with scores lower than 3 or higher than 7 are not included here

For docility - 1 is Ideal (docile), 3 is less ideal (restless) and 5 is aggressive (Scores of 1 and 2 are preferred).

Please Note: Structural scores are not a GUARANTEE. They should be used as a guide only.

BEEF CLASS STRUCTURAL ASSESSMENT GUIDE			
Trait	Key	Scoring Range	
Docility	D		1. Docile 3. Restless 5. Aggressive
Front Feet Claw Set Rear Feet Claw Set	FC RC		1. Open/Divergent 5. Good 9. Scissor Claw
Front Feet Angle Rear Feet Angle	FA RA		1. Stubbed Toe 5. Good 9. Shallow Heel
Rear Legs Side View	RS		1. Straight 5. Good 9. Sickle Hocked
Rear Legs Hind View	RH		1. Bow Legged 5. Good 9. Cow Hocked
Front Legs Front View	FF		1. Bow Legged 5. Good 9. Knocked Knee

CONDITIONS OF SALE

1. **The Sale:** will be conducted in accordance with conditions of sale as set down by the Hawke's Bay Stock and Station Agents Association, a copy of which will be exhibited at the sale.
2. **Veterinary Test:** Glen Anthony Stud is accredited for both Brucellosis and Tuberculosis- C10. These bulls are all blood tested free of B.V.D. and vaccinated twice before sale.
3. **Semen & Service Testing:** All entries in this sale have been semen tested and serving ability tested prior to sale. This is Glen Anthony Stud's commitment to clients, to put up for sale a quality assured product - a bull that at the point of sale is 100% fertile and capable of serving. We encourage buyers to insure their bulls at the point of sale to cover them for problems that may arise from that time onwards which are outside the vendor's control.
4. **Insurance:** Each lot will be at the risk of the purchaser as from the fall of the hammer. Transit insurance and period insurance can be arranged with the Auctioneers. No errors, omissions or misdescription will in any way invalidate the sale.
5. **Breed Society:** Breed society transfers must be signed prior to animals being removed from the selling centre.
6. **Animals sold for export:** Sales to overseas buyers are conditional on the animals passing the necessary export tests. Unless the animals fail the tests all costs from the fall of the hammer will be borne by the purchaser.
7. **Deliveries:** Before any animal is removed from the selling centre a delivery instruction sheet must be completed and signed by each buyer.

Simmental Trans Tasman Group Breedplan Performance Data

Breedplan is a modern genetic valuation programme for beef cattle. It produces Estimated Breeding Values (EBV's) for a range of traits including: Milk, birthweight, 200 day weight, 400 day weight, and 600 day weight.

An EBV is a prediction of the genetic merit of an animal for that production trait expressed as + or - kg in comparison to a base of 0.

The Simmental Trans Tasman Group Breedplan allows EBV's to be calculated not only from the performance of an animal compared to its contemporaries within the same herd but also from the performance of all known relatives and progeny. It also simultaneously takes into account correlated traits and genetic linkage across different herds and so is able to relate an animal's performance to all animals from all years across the breed and compare this to a breed base of zero.

Group EBV's are the best figures available on the relative performance of Australian and New Zealand Simmentals for each important trait. Used in conjunction with assessment for structural soundness, fertility and muscling ability they help take the guesswork out of bull buying.

(Current EBV's are listed in this catalogue)

COMMENTS:

Another smooth Y-arta son showing length and thickness. A great shoulder and neck extension. Been used in service. EBVs indicate easy calving and low birthweight.

COMMENTS:

A rugged polled Y-arta son. Look at the power in his muscle pattern, excellent thickness and depth. Top 1% EBVs for calving ease and top 15% for birth weight but would recommend mating to older bigger cows.
